**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 26 February 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/12/2008 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 14, 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Choi (5,676,684) in view of Wybrants (2,441,682) and Gabrusenok (SU 1264942).** Choi discloses base member (15) and needles (see column 5, line 14) fixed therein, each of the needles comprising a rod member, a sharpened portion and a head (the portion of the needle adjacent to base member 15). Choi also discloses the various needles in the same treatment device can be different materials (see column 5, lines 28-32). However, Choi does not disclose the needles having enlarged head portions lying in a single plane.

4. Attention is drawn to Wybrants, who teaches elongated treatment elements (19, analogous to needles) having head portions (see figure 3) in a single plane to retain the treatment elements on the base member of the applicator. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have included heads arranged in a planar fashion on the needles of Choi in the manner taught by Wybrants to help retain the needles in the base member.

5. Further, the combination of Choi and Wybrants fails to disclose the needles as being partially coated with a coating. However, Gabrusenok teaches that acupuncture needles should be partially coated with coatings of a material which is different than the needle material in order to obtain the advantage of creating electrochemical potentials (see abstract of Gabrusenok). It would have been obvious to partially coat the Choi needles with a material which is different than the material of the needles so that it too would have this advantage. Further, it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. Therefore, one of ordinary skill in the art would have recognized that choosing various materials for the needles would be obvious.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 14, 24 and 25 have been considered but are moot in view of the new ground(s) of rejection.

**Conclusion**

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan J. Severson whose telephone number is (571) 272-3142. The examiner can normally be reached on Monday - Friday 8:30-5:00.
8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anh Tuan Nguyen can be reached on (571) 272-4963. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
